

Power-Bus for the TURCK *interfacemodul* Series PB-08/03 PB-16/03 PB-32/03

- **Voltage supply for processors of the *interfacemodul* series**
- **8, 16 or 32 devices connectable**
- **Cable length between voltage supply and Power-Bus: 2 m**

The TURCK Power-Bus serves for voltage supply to processors of the *interfacemodul* series.

The Power-Bus can supply voltage up to 32 devices in 18 mm housings.

The following device types are available:

- PB-08/03: 8 module connections
- PB-16/03: 16 module connections
- PB-32/03: 32 module connections.

The cable length between the voltage supply and Power-Bus is 2 m. The cable length is approx. 45 mm between the individual terminals.

Type	PB-08/03	PB-16/03	PB-32/03
Ident-no.	6900370	6900371	6900372
Cable			
– Cable cross-section	2 x 0.75 mm ²		
– Cable type	H 05 V-K		
– Cable lenght between terminals	approx. 45 mm		
– Cable length between supply voltage and Power-Bus	2 m		
– Input voltage	0...230 V AC/DC		
– Output voltage	0...230 V AC/DC		
– Cable sheath colour	RD (with DC +U _B) BK (with DC –U _B)		
Terminals			
3-pole terminal blocks with coding
